Steps to modify the registry:

1. Note the physical adress of the card which you can obtain in the CIF Device Driver Test $\ensuremath{\mathsf{Program}}$

÷.

	IF Device Dri	ver Test Pr	ogram			
ē	Board select	Driver info	Driver function	Data transfer Help		
	Device	GetBoardI	nfo	_		
	D	river version	CIFDriver V3.	111		
	В	oard Number	Available	Physical address	s IRQ number	
	[1	1	FFDFE000	0	_
		3	0	0	0	
	<u></u>					

2. Open the windows registry (by regedit.exe)

a) Go to the key HKEY_LOCAL_MACHINE -> SYSTEM -> CurrentControlSet ->
Services -> RTIOdrvHilscherDPM -> Params and set the value AutoDetection to
0

•		•				

b) Go to the key HKEY_LOCAL_MACHINE -> SYSTEM -> CurrentControlSet -> Services -> RTIOdrvHilscherDPM -> Params -> Device0 (if only one card is installed, i thought so) and create a new DWORD value Adress and set it to the adress you noted before

c) Also create a STRING value Type and set it to 8K_DPM
